GitHub: https://github.com/ssddqqww | Applicant Website: https://kseniia-gubenko.com/ | Applicant Portfolio: https://drive.google.com/file/d/1ooeZgNK6G1LZnFLa4dLFPTDwY4lRE271/view?usp=sharing

Profile: Computer science applicant building and shipping full-stack products, and applying CS to research problems in security, health, and learning. Founder of two products used and tested by real users, researcher in computer vision and AI, and Python teacher for girls. Strongest evidence: shipped code, security and data work, and selective research programs.

Technical Skills

- Core, used in shipped projects: Python, JavaScript, TypeScript, React, Next.js, HTML/CSS, Tailwind CSS, SQL, PostgreSQL / Supabase
- Also used: Node.js, Express, MongoDB, Streamlit, Solidity, Java, Aiogram, Leaflet, REST APIs
- Areas: full-stack web development, authentication and database access control, data preprocessing and visualization, cybersecurity auditing, computer vision research, AI evaluation
- Languages: Ukrainian (native), Russian (fluent), English (advanced), Chinese (intermediate), French (beginner)

Education

Gymnasium A+ — Kyiv, Ukraine (Online) — Sep 2025 – Present, graduation June 2027

- Diploma of Completed General Secondary Education, GPA 11.94/12; Math 100%, English 100%
- English-medium program focused on academic writing, research skills, and independent study

Harvard Venture & Technology Summer Program — Jun – Jul 2026

- Selected participant, estimated acceptance rate under 13%; awarded 42% merit scholarship
- Completed workshops, case studies, and collaborative projects in startup innovation with international students

She Leads 2.0 Program, uBoost — Feb – Jun 2026

- Selected from about 360 applicants for a national leadership and entrepreneurship program for young women
- Presented Golden Minute, selected among the Top 20 projects; served as Cohort Representative for about 20 participants, coordinating communication and group engagement

Technical Projects

Forgotten Scientists — Founder & Executive Director, Sep 2025 – Present, Ukraine (remote)

- Founded and led an international team of 10+ students; published 100+ scientist profiles and reached 45,000 social media profile visits.
- Architected and developed the platform's core full-stack infrastructure using Next.js, React, TypeScript, Tailwind CSS, and Supabase / PostgreSQL.
- Engineered secure authentication and user accounts with custom REST API endpoints, cryptographic password hashing, session management, and database access controls.
- Built interactive geospatial maps with Leaflet, dynamic timelines, a searchable scientist archive, and educational quizzes.

Golden Minute — Founder & Product Lead, Feb 2026 – Present, Ukraine (remote)

- Built a functional MVP of an AI-powered first-aid training platform with interactive scenarios, quizzes, learning modules, and personalized feedback, and led an 8-person team across development, research, product strategy, and UX.

- Validated demand and product direction by surveying 77 respondents and usability-testing the MVP with 30 users, then used the findings to guide improvements.
- Selected among the Top 20 of 120 projects in She Leads 2.0 and Top 5 of about 30 projects in the Tech Youth Mentorship Program; received product validation from the founder of Ileria.

Technovation Girls 2025 — Team Lead & Project Developer, Mar – May 2025, USA (remote)

- Founded and led a team building a financial literacy mobile app for teenagers, owning product strategy, audience analysis, development, and the final pitch.
- Designed 5 interactive lessons and built core content on budgeting, saving, and responsible money management.

Research

Polygence, Research for Impact Program — Research Scholar, Jun 2026 – Present, USA (remote)

- Awarded a full scholarship for an independent research project.
- Investigating computer-vision approaches to accelerate phenotypic antimicrobial susceptibility testing (AST), with potential application to multidrug-resistant wound infections in conflict-affected healthcare settings.
- Conducting a literature review and developing the research methodology under a mentor who earned his PhD from MIT.

BilimX Research Program — Research Scholar, Sep 2026 – Present, Ukraine (remote)

- Selected as one of about 15 scholars from 500+ applicants for a six-week international research mentorship program.
- Co-authoring a paper on how biologically inspired learning mechanisms could improve the computational efficiency of artificial neural networks.
- Independently investigating how demographic imbalances in biomedical datasets affect AI model performance and reliability, under a PhD-trained computer scientist specializing in AI and quantitative algorithms.

Junior Academy of Sciences of Ukraine — Research Author & Software Developer, Nov 2024 – Sep 2026, Kyiv

- Researched blockchain-based protection of UAV-collected data and built a secure system prototype in Python, Solidity, and JavaScript.
- Authored and defended the paper, earning 3rd Place in the Cybersecurity Section among 29 participants, and presented the work at the VII Ukrainian Youth Internet Governance Forum and at the Beyond Human conference.

Beyond Human: Transitional Object and AI, International Scientific Conference — Research Speaker & Conference Moderator, Sep 2026, USA (remote)

- Presented original research on integrating AI and blockchain to secure UAV-generated data; youngest speaker among 21 international presenters; moderated sessions, facilitated speaker discussions and audience Q&A.

Experience and Internships

CyberField Net — Cybersecurity Specialist Intern, Aug 2026 – Present, Ukraine (remote)

- Auditing technical security and assessing cybersecurity risk to identify vulnerabilities, misconfigurations, and organizational security risks.
- Reviewing Microsoft 365 and Google Workspace configurations, including identity and access management, permissions, authentication, and account protection.
- Documenting findings and developing prioritized recommendations with a team of about 10 to strengthen clients' security posture.

Orion Intelligence — Technical Intern, Jun – Jul 2026, Ukraine (remote)

- Built an aviation intelligence dashboard with an international team in Python, Streamlit, and the OpenSky API, processing 625 aircraft-position records to identify movement patterns and data anomalies.
- Developed data preprocessing and filtering algorithms, contributed to model evaluation, and built interactive visualizations.

- Led the team for one week, coordinating technical tasks, and co-presented the final prototype and findings to the CEO.

Mathematics Instructional Design Intern, Ukrainian NMT Preparation — Researcher & UI/UX Designer, Feb – Jun 2026, Ukraine (remote)

- Structured mathematics content for the Ukrainian National University Entrance Examination from public exam materials, curriculum sources, and 4+ educational platforms.
- Built 15+ full-length presentations, 650+ slides, translating complex problems into step-by-step solutions with student-friendly visual structure.

Hackathons

- INFOMATRIX International Hackathon, Bucharest, May 2025: Designed and implemented HTML/CSS components and UI/UX structure and led content architecture and narrative; awarded Bronze Medal / 3rd Place among 25+ international teams.
- NASA Space Apps Challenge, Oct 2025: Developed the full frontend architecture and user interface for a web-based asteroid impact simulation in a 48-hour international hackathon; transformed scientific scenario data into an interactive website and supported the final technical pitch.

Leadership, Teaching, and Service

- Women's League NGO — Volunteer Engagement Coordinator & Researcher: Supported engagement for 100+ volunteers; researched 30+ youth centers and partner organizations; conducted outreach to about 800 organizations and contacts.
- Inclusive Academy — Volunteer Coordinator & Tutor: Tutored 3 students with special educational needs in mathematics, IT, and English for about 75 volunteer hours, then advanced to coordinating a team of about 30 volunteers.
- PyGirls — Volunteer Python Trainer: Led interactive Python workshops for groups of 5–10 girls, teaching Python fundamentals through live coding and tracking attendance and engagement.
- Stop-Sexting Children's Council — Member & Technical Developer: Developed an educational website featuring digital safety guides, resources, and event materials; organized a digital safety event attended by approximately 100 participants.
- International Tygers Olympiad — Ambassador: Promoted mathematics competitions among high school students and recruited 14 new participants for local and national contests.

Awards and Rankings

- Selected Finalist, IOAI Ukraine National Selection 2026: ranked 11th among 2,300 applicants after a 3-stage selection, Top about 0.5%
- Bronze Medal / 3rd Place, INFOMATRIX International Hackathon, Bucharest 2025, among 25+ international teams
- 1st Place, AntiSchool All-Ukrainian Online Mathematics Olympiad 2026, Grade 11 Division
- Finalist, Global Logic & Reasoning Competition (GLRC) 2026, advanced through three rounds
- 7th Place, ICOA Cybersecurity Olympiad Stage I Qualifier: Top 2.5% of 280+ participants
- 3rd Place, Junior Academy of Sciences of Ukraine, Cybersecurity Section, among 29 participants
- Semi-Finalist, International Computer Science Competition (ICSC) 2026, advanced to the international Pre-Final Round
- FLEX Program Semi-Finalist: Top about 10–15% nationwide in Ukraine
- Selected Participant, TED-Ed Talks Ukraine 2026: 23 selected from 62 applicants

Certifications and Courses

- Harvard CS50, Introduction to Computer Science (in progress)
- University of California San Diego (Coursera), Data Structures; IBM (Coursera), Introduction to Artificial Intelligence; Board Infinity (Coursera), Backend Development: Node.js, Express, MongoDB & REST APIs
- Forage Technology Engineering Job Simulation (Lloyds Banking Group); Forage Software Engineering Job Simulation (Wells Fargo)
- Leagues of Code: Python 1, Python 2 (IOAI Spain, English), Maths 101; Leaf, Biology for a Better Tomorrow
- Girls Who Code Pathways Summer Program, Jun – Aug 2026: completed 18 courses across Data Science & AI, Cybersecurity, AI & Society, Web Development, and Game Design
